State Contract # 986739 Goldstrike Reclamation and Monitoring

Correspondence with BLM and DWR

Doug, I went out to the mine site this morning. The rain gauge at Guzzler # 2 was empty. We have had no rain for 60 days and the snow was gone on the backside of Squaretop Mountain. The heap off flow had dropped to about 4.5 GPM.

I didn't see any sign of Chukers but I did see about the turkeys down by the front gate. The guzzlers were about 1.5 inches from the top.

080004

The East Fork was running about 2.0 CFS. The clover and alfalfa was coming up and looking good, but the cheat grass had come in and was turning things brown.

The road was still in very good shape. We need some more rain now to keep the heaps green. It looks like a bad year for grasshoppers, they were everywhere. There were cows down by Forbes Cabin but none at the mine site.

That's all for this month-

Dan Slyter
